

# MTSA Technopower Make Switch 1210 - 17.5 kV/100 kA

Short circuit tests in high power laboratories require fast and reliable make switches. The MTSA Make Switch 1210 - 17.5 kV/100kA fully meets these requirements:

- Fast
- Pneumatic driven
- Air isolated (no SF6 needed)
- Accurate timing (phase angle)
- Adjustable delay unit
- Per set 3 synchronised phases, 1 control unit
- Allows simultaneous switching of make switches of multiple generators
- Long life, interference free.

MTSA Technopower offers a range of the latest generation Make Switches, all with MTSA expertise and intelligence inside.

For more info please contact MTSA Technopower, department E&I (tel direct: +31 (0)26 3844 282).
