

MTSA Technopower Make Switch 1210

Make Switch 1210

Remote Control Unit

Local Control Unit

Short circuit tests in high power laboratories require fast and reliable make switches. The MTSA Make Switch 1210 fully meets these requirements:

- Fast
- Pneumatic driven
- Air isolated (no SF6 needed)
- Accurate timing (phase angle)
- Adjustable delay unit
- Per set 3 synchronised phases, 1 local control unit and 1 remote control unit (optional)
- Allows simultaneous switching of make switches of multiple generators
- Long life, reliable.

MTSA Technopower offers a range of the latest generation Make Switches, all with MTSA expertise and intelligence inside.

For more info please contact MTSA Technopower, department E&I (tel direct: +31 (0)26 3844 282).
